

BEST PRODUCE & GRAINS *for* SUMMER HARVEST

Tomatoes

A summer staple—from slicing varieties to sweet cherry types.

Peppers

Thrive in warm weather, variety of sweet and hot options.

Cucumbers

Prolific with regular harvests ensure continued production.

Green Beans

Bush and pole varieties produce tender pods. Successive sowing can extend yield.

Zucchini

Require frequent picking due to rapid growth.

Watermelon

Ideal for hot summer months.

Berries

Strawberries, blueberries, and raspberries enhance summer harvest.

Watermelon

Ideal for hot summer months.

Sweet Corn

A warm-season crop best planted in blocks for good pollination.

Melons

Benefit from warm temp., producing sweet, aromatic fruit.

Sweet Corn

A warm-season crop best planted in blocks for good pollination.

Millet

Heat-tolerant, semi-perfect for late spring planting for human consumption and animal.
